**FEATURES & SPECIFICATIONS**

**APPLICATIONS** — The BA15s 4.0W LED bulb is an energy-efficient replacement for traditional incandescent BA15s base lamps. It's ideal for use in most 12V BA15s fixtures and offers comparable light output (400 lumens) to a 40-watt incandescent bulb. This bulb is a great choice for applications where color accuracy is important, thanks to its excellent color rendering index (CRI) of 90+. Additionally, it boasts a long lifespan of 25,000 hours, reducing the frequency of bulb changes. Great for pathway lighting fixtures like the Techlight Pathlight Series.

**FEATURES** — The BA15s 4.0W LED bulb is constructed with a ceramic and PC base, and it operates on 12V AC/DC voltage. It delivers a warm white light (either 2700K or 3000K color temperature) with a beam angle of 360 degrees, suitable for general lighting applications. For compatible dimming options, refer to the manufacturer's instructions as the bulb is dimmable with most magnetic and electronic LED compatible transformers and MLV and ELV dimmers.

**LISTINGS** — ETL Listed for damp locations. RoHS compliant.

# LMP LED 4 BA15s

## 4W 12V BA15s Retrofit LED Lamps

**WARRANTY** — Lamps are covered by a limited lifetime warranty throughout the life-time of the lamps.

**ORDERING INFORMATION**

Choose the bold face options for the appropriate configuration for your application and enter on the line above each fixture attribute.
